FINAL YEAR DESIGN PROJECT

BS Data Science · NED University of Engineering & Technology

Salesforce Mobile Business Analytics & Forecasting Application

Sales insight, wherever work happens.

A mobile-first decision-support experience in Salesforce, bringing customer records, pipeline visibility, KPIs and timely alerts together.

MOBILE-FIRST SALES INSIGHTS, ALL IN ONE PLACE

01 / THE NEED

Sales context should travel with the team.

When people are away from a desktop, a clear view of customers, pipeline and priorities can be harder to reach.

Scattered visibility
Useful context sits across customer and sales records.

Delayed follow-up
Reminders and changes can be missed while on the move.

Pipeline blind spots
Stage, value and close-date visibility supports decisions.

Access must fit roles
Teams need relevant access to records and sensitive fields.

WHY IT MATTERS Timely follow-up · pipeline awareness · role-appropriate decisions

02 / THE SOLUTION

One mobile-first Salesforce experience.

Bring the selected CRM objects, secure access, analytics and Salesforce Flow alerts into a practical mobile workflow.

Open on mobile
Salesforce Mobile App

→

Check access
Role, record & field security

→

Review insight
Reports, KPIs & pipeline

→

Act in time
Supported Flow notifications

03 / PROJECT ARCHITECTURE

Built on Salesforce's standard sales data model.

Mobile app → native Salesforce security → four selected standard objects → reports, dashboards & Flow automation

SELECTED CORE OBJECTS

- LEAD
- ACCOUNT
- CONTACT
- OPPORTUNITY

Lead conversion creates or links an Account and Contact, with an Opportunity optional. Each Account can relate to multiple Contacts and Opportunities.

ACCESS & INSIGHT

- Profiles + permission set groups
- Role hierarchy + record sharing
- Field-level security
- Role-filtered KPI dashboards
- Salesforce Flow notifications

KPIs: Total Leads · Lead Conversion · Total Sales · Revenue · Pipeline Target Achievement · Growth

04 / WHAT USERS CAN DO

Useful sales context, built for the day-to-day.

Lead visibility
Review and follow up; see conversion progress.

Pipeline tracking
See opportunity stage, amount and close date.

Customer context
Connect Account and Contact information.

KPIs & dashboards
Explore sales metrics and pipeline reports.

Timely notifications
Supported Flow alerts for key events.

Role-aware security
Records and fields follow assigned access.

PROJECT VALUE

Designed to support better-timed, better-informed sales decisions.

Mobile access to relevant Salesforce information

Role-specific visibility and protected fields

Analytics, follow-up and pipeline awareness

THE TEAM

NED University × Nespon Solutions

FYP · 2026–2027

Fizza Ahmed
Group Leader · DT-23304

Wajiha Adnan
Group Member · DT-23001

Taaha Nadeem
Group Member · DT-23303

Muhammad Abdullah Kidwai
