Salesforce RBAC Work Report

Salesforce Mobile Business Analytics & Forecasting Application

Work evidence: 25 October 2026 | Report prepared: 26 October 2026

Scope	Evidence basis
Permission sets, permission set groups, Account/Contact/Opportunity access, and report/dashboard folder sharing.	Actual screenshots supplied in chat plus progress the user explicitly confirmed. This report does not claim live-org access or independent testing.

Work completed / recorded

- Created role-based permission sets and groups for Sales Representative, Sales Manager, Sales Ops/RevOps Analyst, VP Sales/Executive, and Executive Viewer.
- Configured object permissions for Accounts, Contacts, and Opportunities. Rep/Manager access was set to Read/Create/Edit with Delete and View All/Modify All off; Sales Ops and VP were set to Read + View All.
- Created project report/dashboard folders for Representative, Manager, and Executive audiences. User confirmed Sales Ops Edit access on Rep and Manager folders.
- Enabled dashboard viewing in the Executive Viewer permission-set setup; no matching Executive Viewer Salesforce Role was available in the folder sharing selector.

Status: RBAC groundwork is set up. End-to-end access is not complete until approved users are assigned, record visibility and sensitive field access are verified, and remaining dashboard/report and Executive Viewer details are resolved.

Current state and remaining work

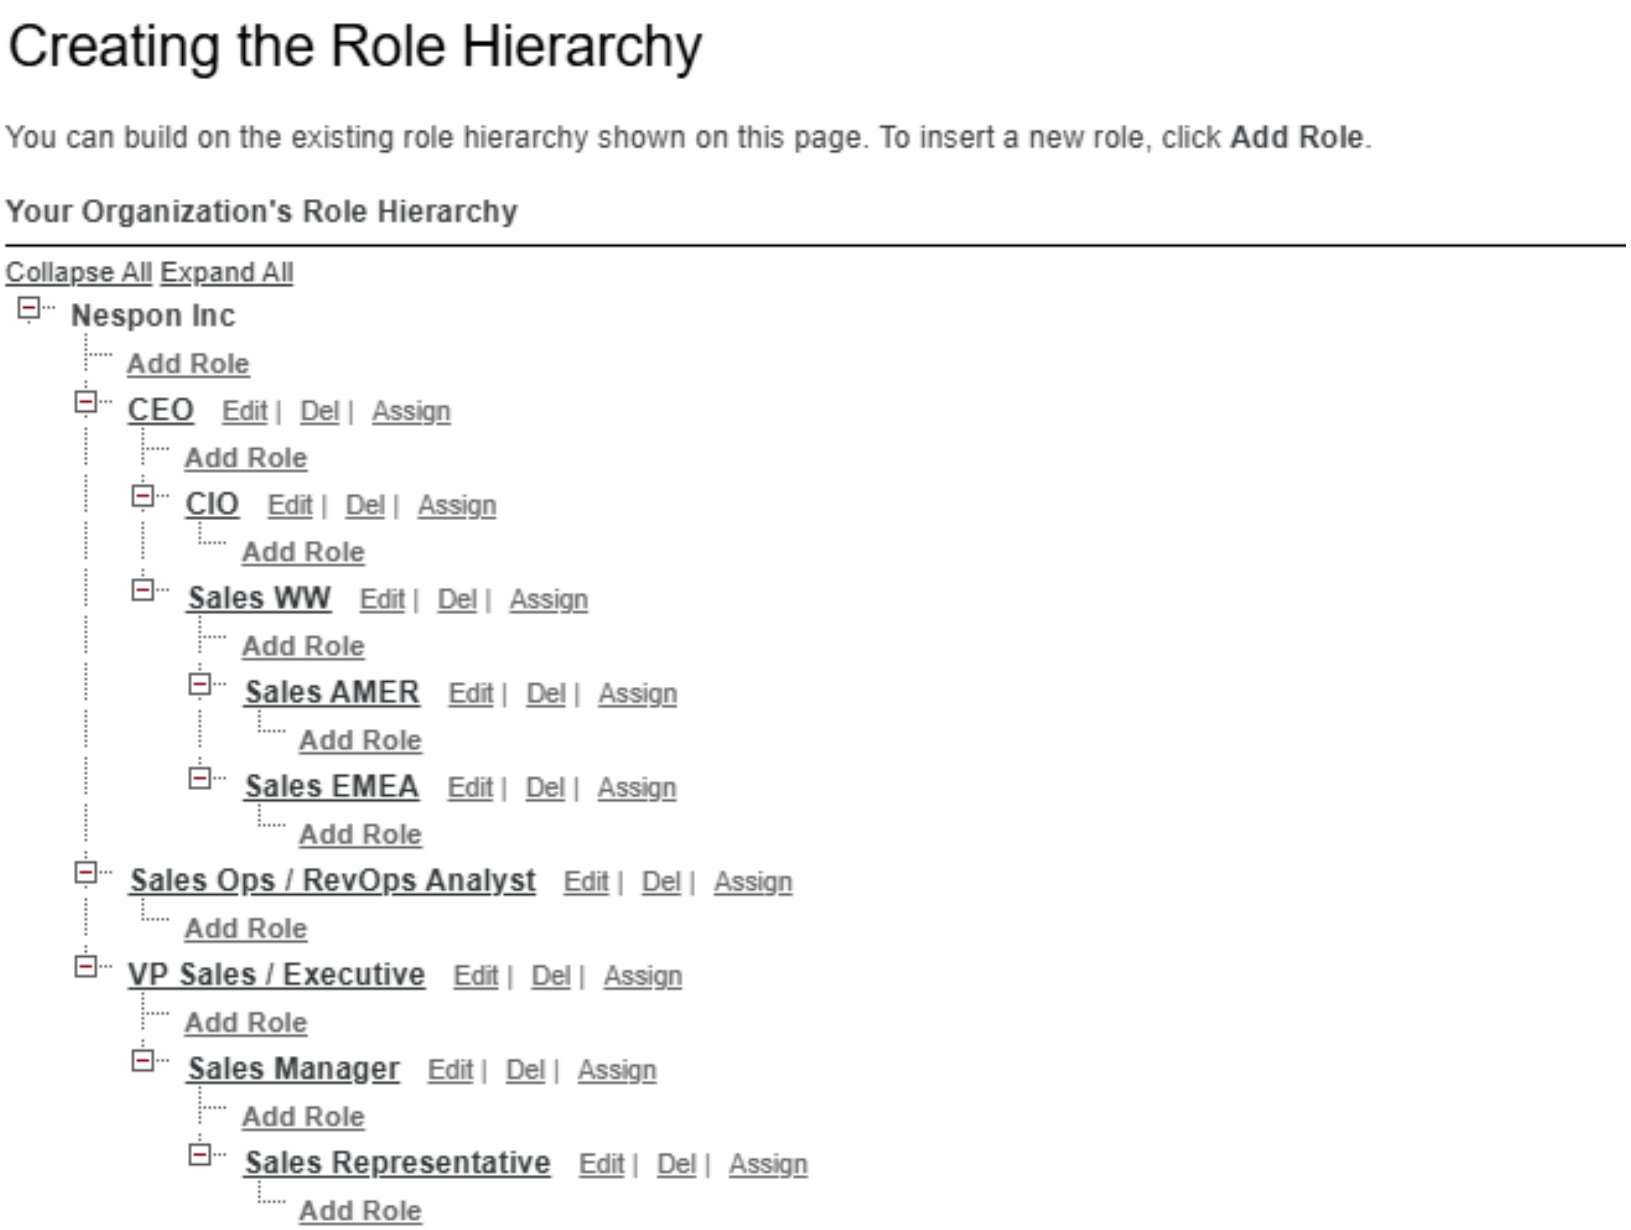

Area	Status
Permission sets and groups	Created for the five user categories above; screenshots show groups and permission-set membership.
Object access	Screenshots support Opportunity settings and Manager Account settings; user confirmed Account, Contact, and Opportunity setup across Rep and Manager. Some field-level settings and Ops limited-write details still need review.
Folder access	Rep and Manager report/dashboard folders were created and role-shared. Sales Ops Edit access on Rep/Manager folders was confirmed by the user. VP Executive folder/view setup is reported; final end-to-end access not tested.
User assignments	Not confirmed complete. No evidence in this work record shows the project permission set groups assigned to approved human users.
Reports and dashboards	Actual project reports and dashboards have not been built yet; the folders are scaffolding. Do not share the Einstein sample folders.
Executive Viewer	Permission Set Group is not a Salesforce Role. No matching role was found in folder sharing; decide a permitted user/public group approach before applying access.

Security and scope checks

- “Own” and “team” visibility depends on org-wide defaults, role hierarchy, ownership, and sharing rules; live settings were not independently verified.
- Quota/commission field-level security needs review. Sales Ops “Manage Reports in Public Folders” may grant broad folder management; review before assigning users.
- Forecasting is a future enhancement and out of current implementation scope. Salesforce Mobile App and declarative configuration are the project direction.
- Do not change the CEO/super account. Use demo/sample data only; do not store credentials, cookies, or tokens.

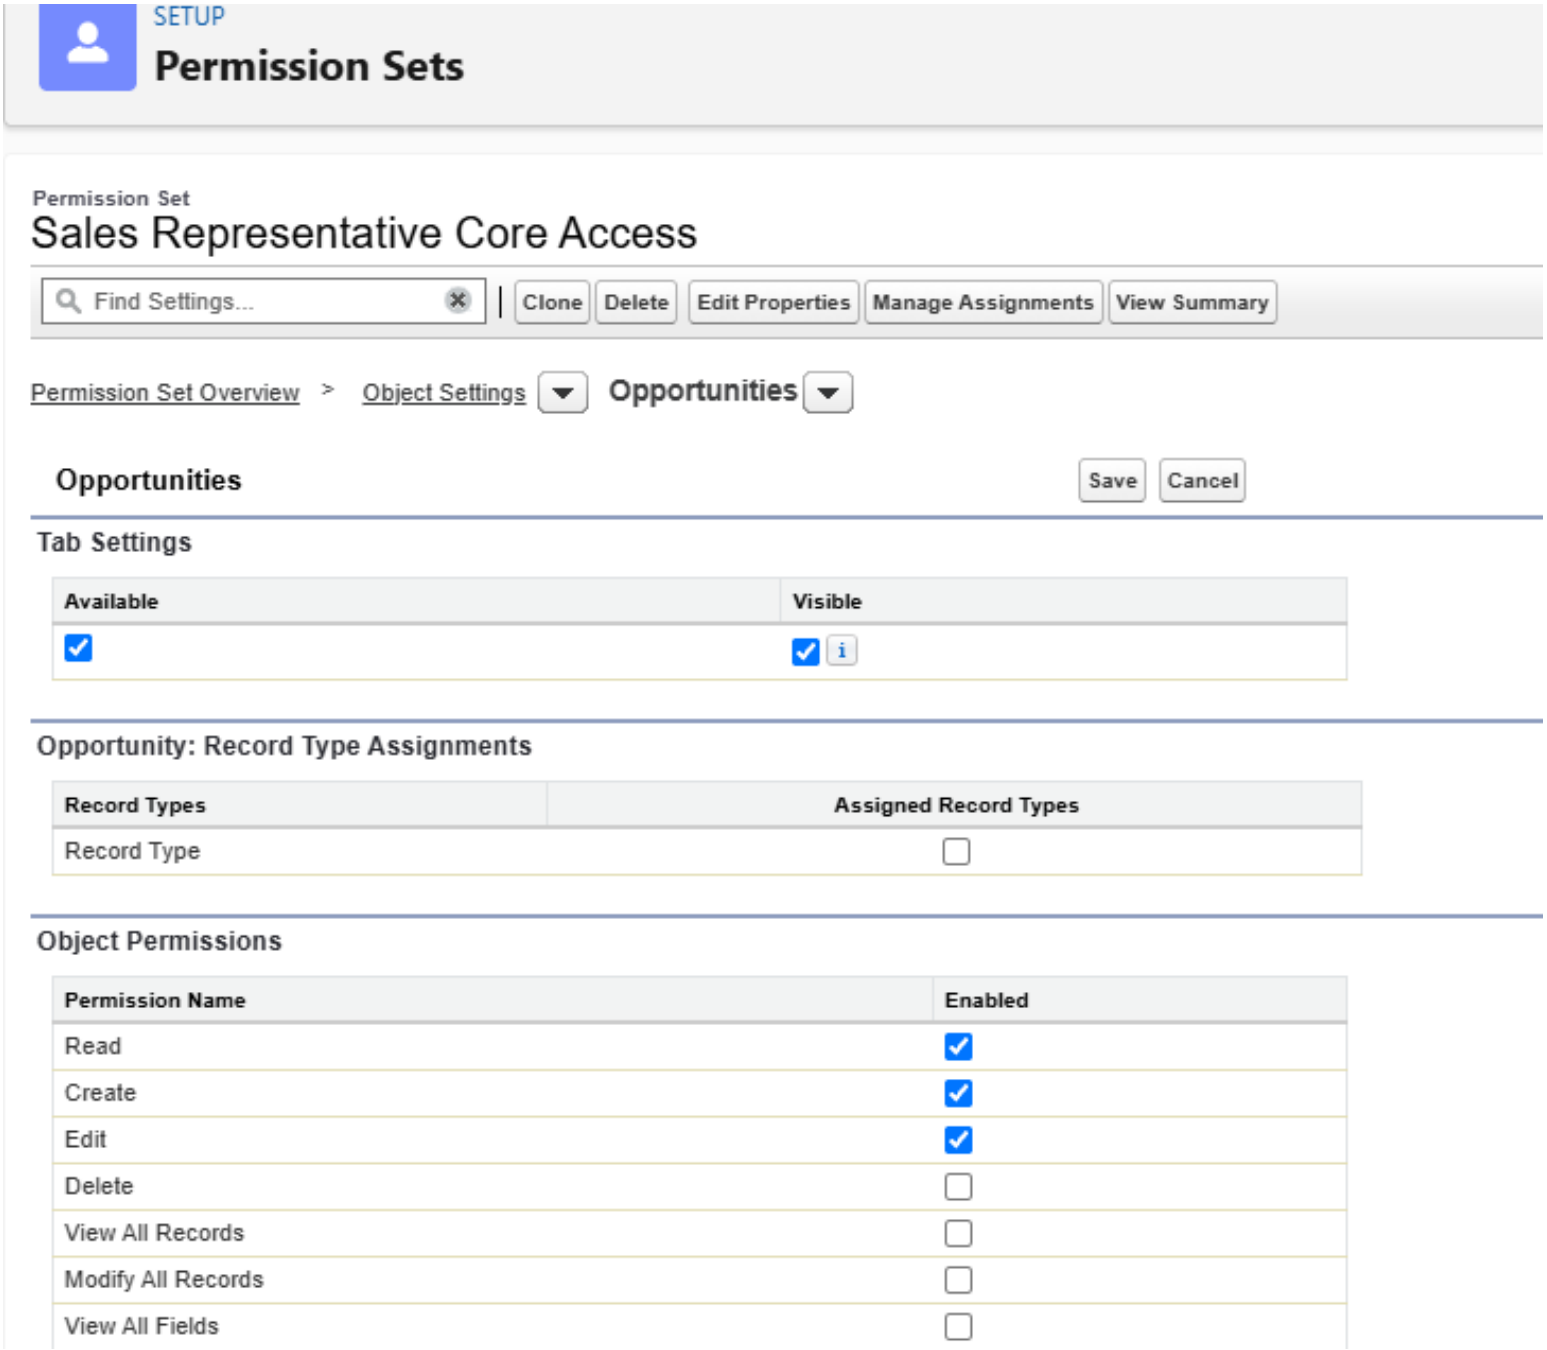

Evidence 01 - Role hierarchy shown in Salesforce Setup

The hierarchy includes the sales and analyst roles used for the RBAC design.

Evidence 02 - Sales Representative - Opportunity access

Visible tab and Read, Create, Edit are enabled; Delete, View All Records, and Modify All Records are off in the captured screen.

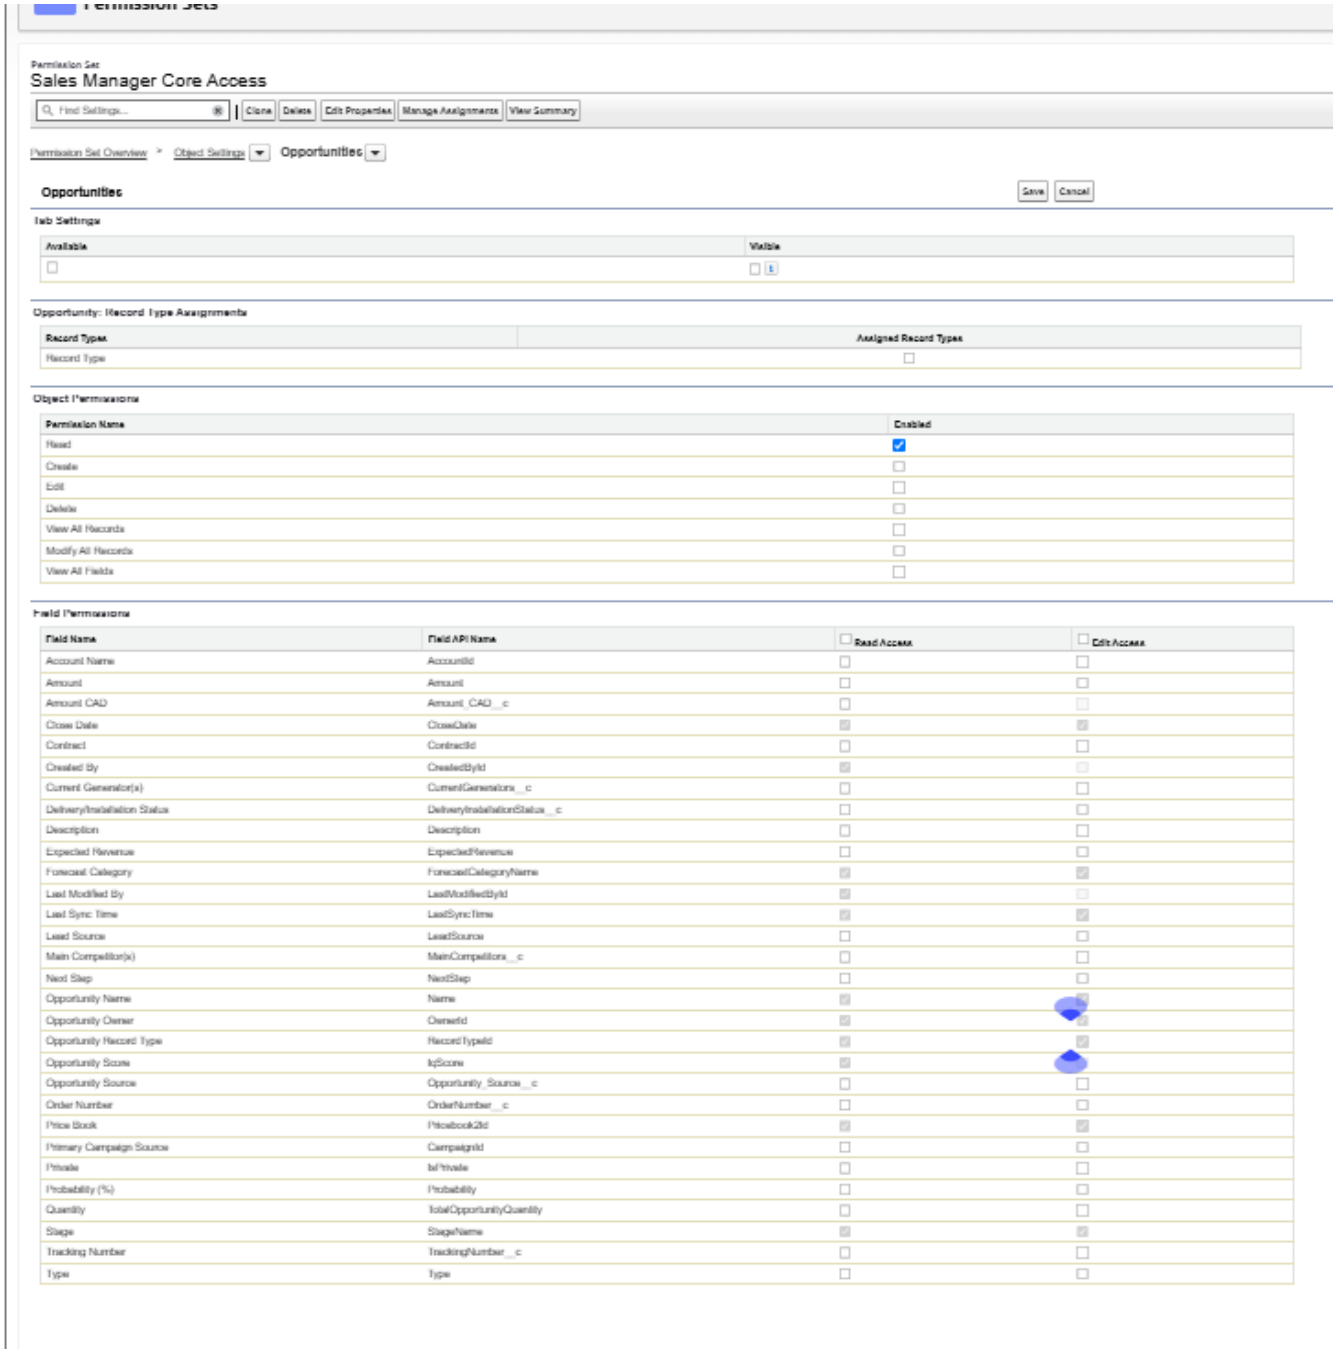

Evidence 03 - Sales Representative - Opportunity field permissions

Field-level selections shown in the permission-set editor. Gray checked boxes are inherited/locked in this Salesforce screen.

Evidence 04 - Sales Manager - Opportunity permission settings

Screenshot evidence of the manager permission-set editor; apply record visibility through sharing and hierarchy as well.

Evidence 05 - Sales Manager - Account permission settings

Account object permission editor; Read, Create, and Edit are selected, with Delete and broad record permissions left off.

Evidence 06 - Sales Ops/RevOps - Opportunity access

Read and View All Records are shown. The matrix also calls for limited write/data-cleanup and quota/territory setup; those details require separate validation.

Evidence 08 - Permission Set Groups list - three role groups

The list shows Sales Representative, Sales Manager, and Sales Ops/RevOps Analyst groups with Updated status.

Evidence 09 - Permission Set Groups list - VP group added

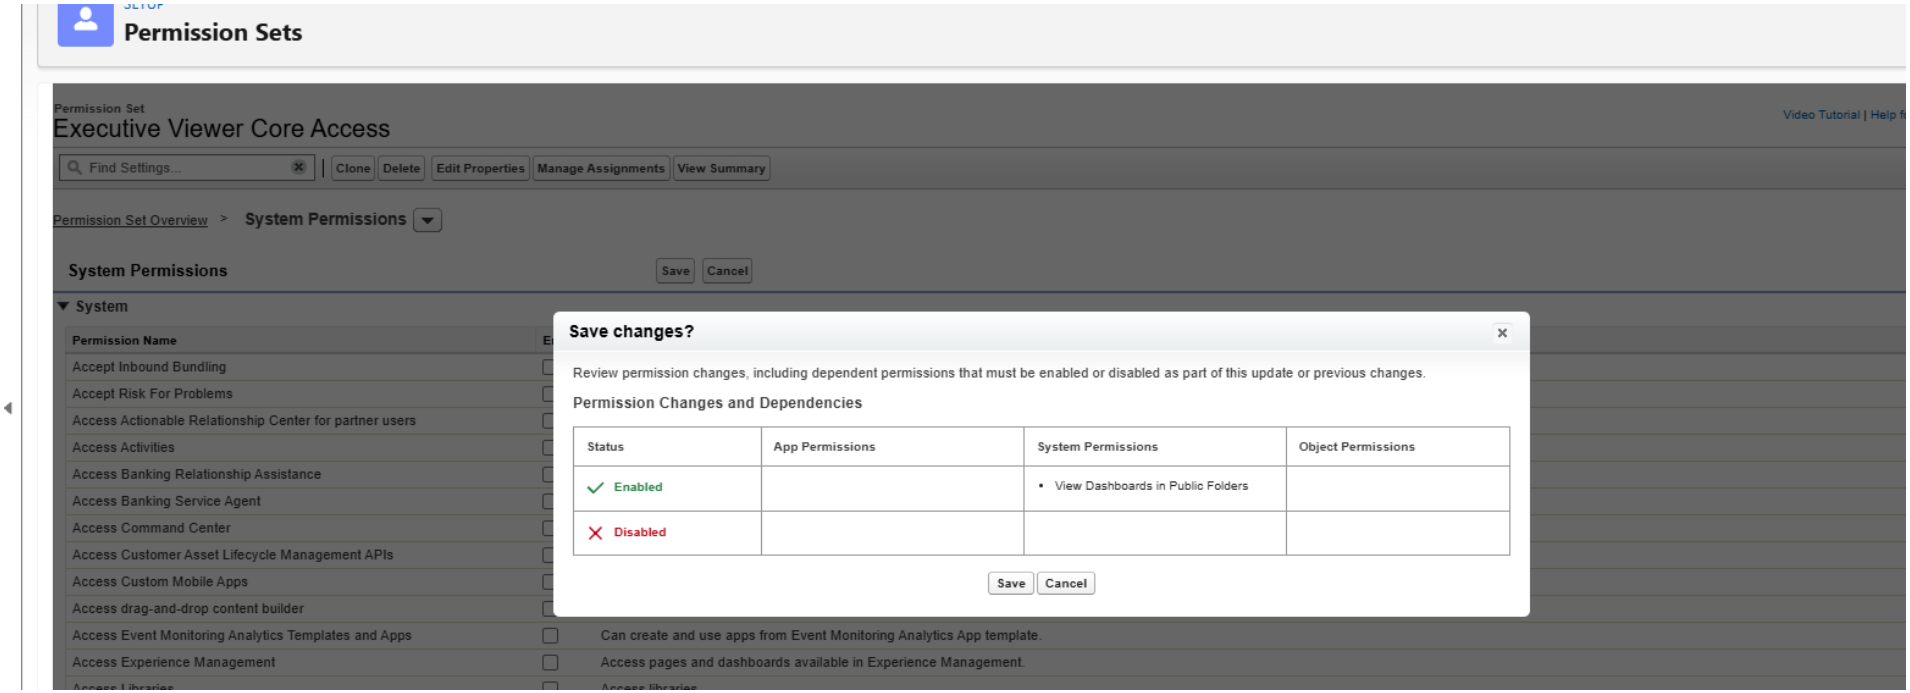

The list shows the VP Sales Executive group alongside the previously created groups.

API Name	Label	Description	Last Modified	Created	Status
Sales_Representative_Access	Sales Representative Access	Sales Representative access per RBAC Matrix.	10/25/2026, 12:13 PM	10/25/2026, 10:47 AM	Updated

Sales_Ops_RevOps_Analyst_Access	Sales Ops RevOps Analyst Access	Sales Ops / RevOps Analyst access according to the project RBAC Matrix	10/25/2026, 12:06 PM	10/25/2026, 12:06 PM	Updated

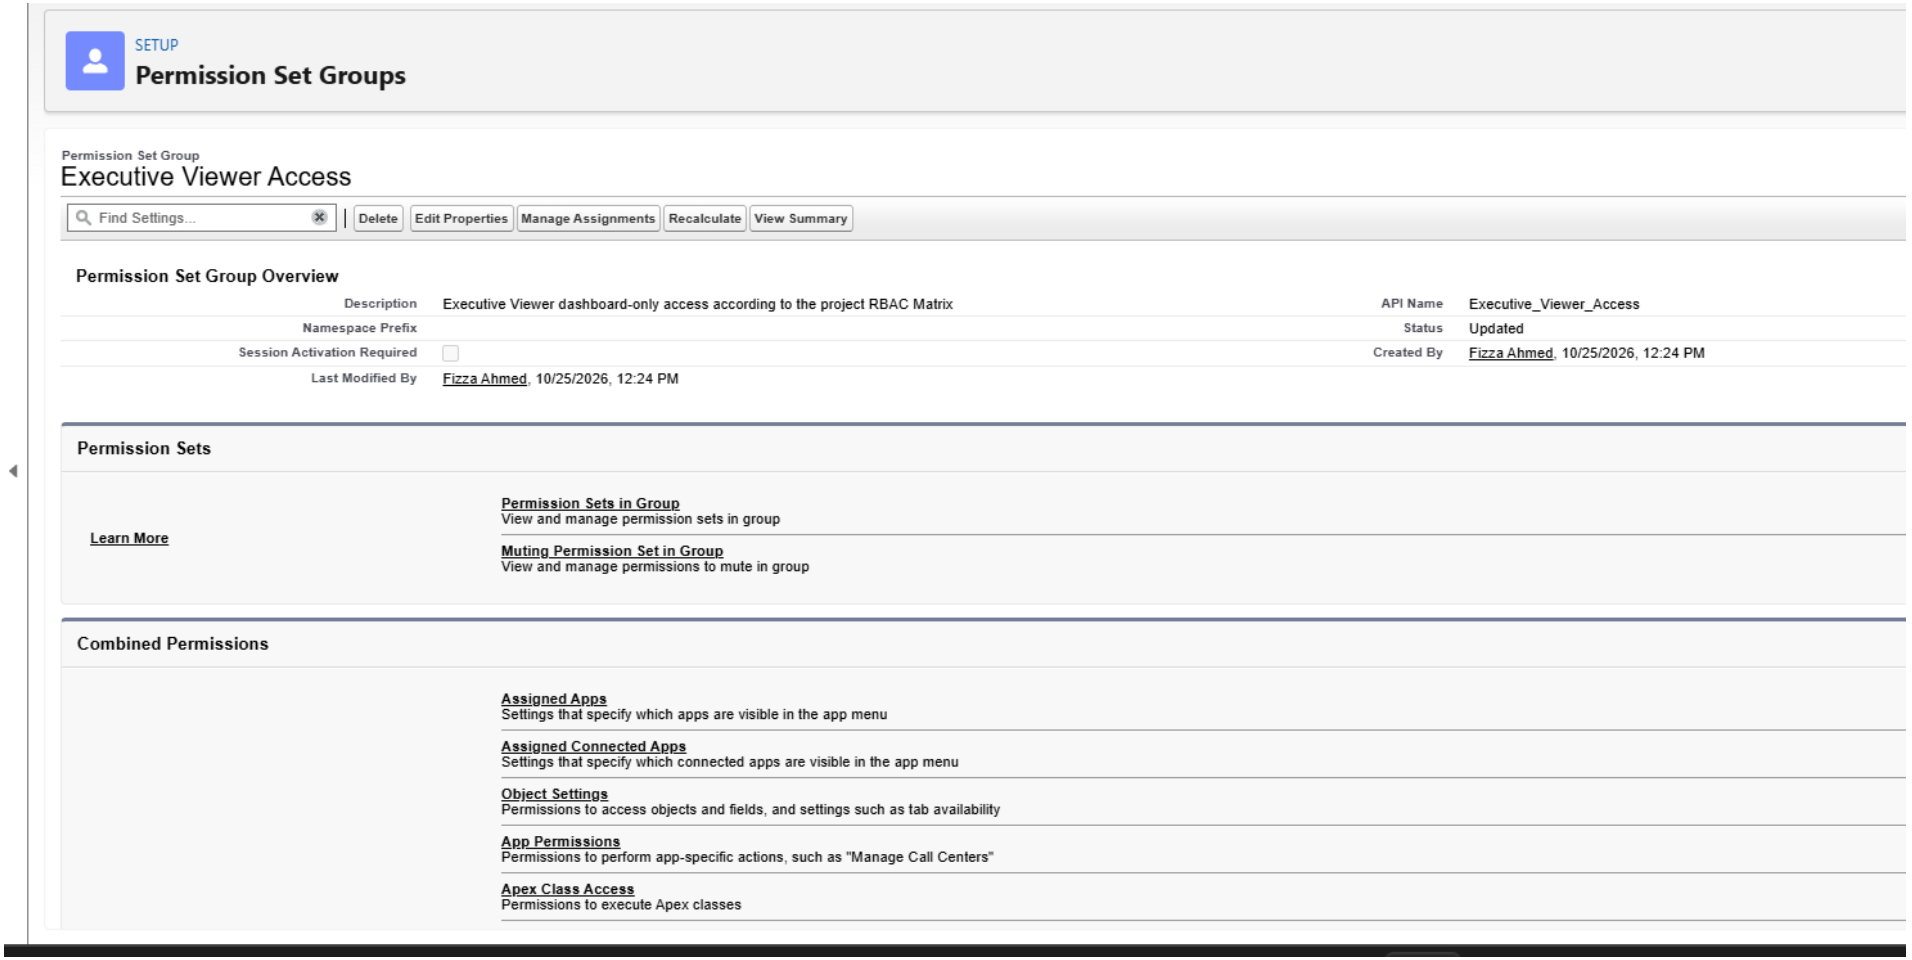

Evidence 10 - Executive Viewer permission-set change review

Salesforce prompts to enable View Dashboards in Public Folders; the screenshot shows the save confirmation step.

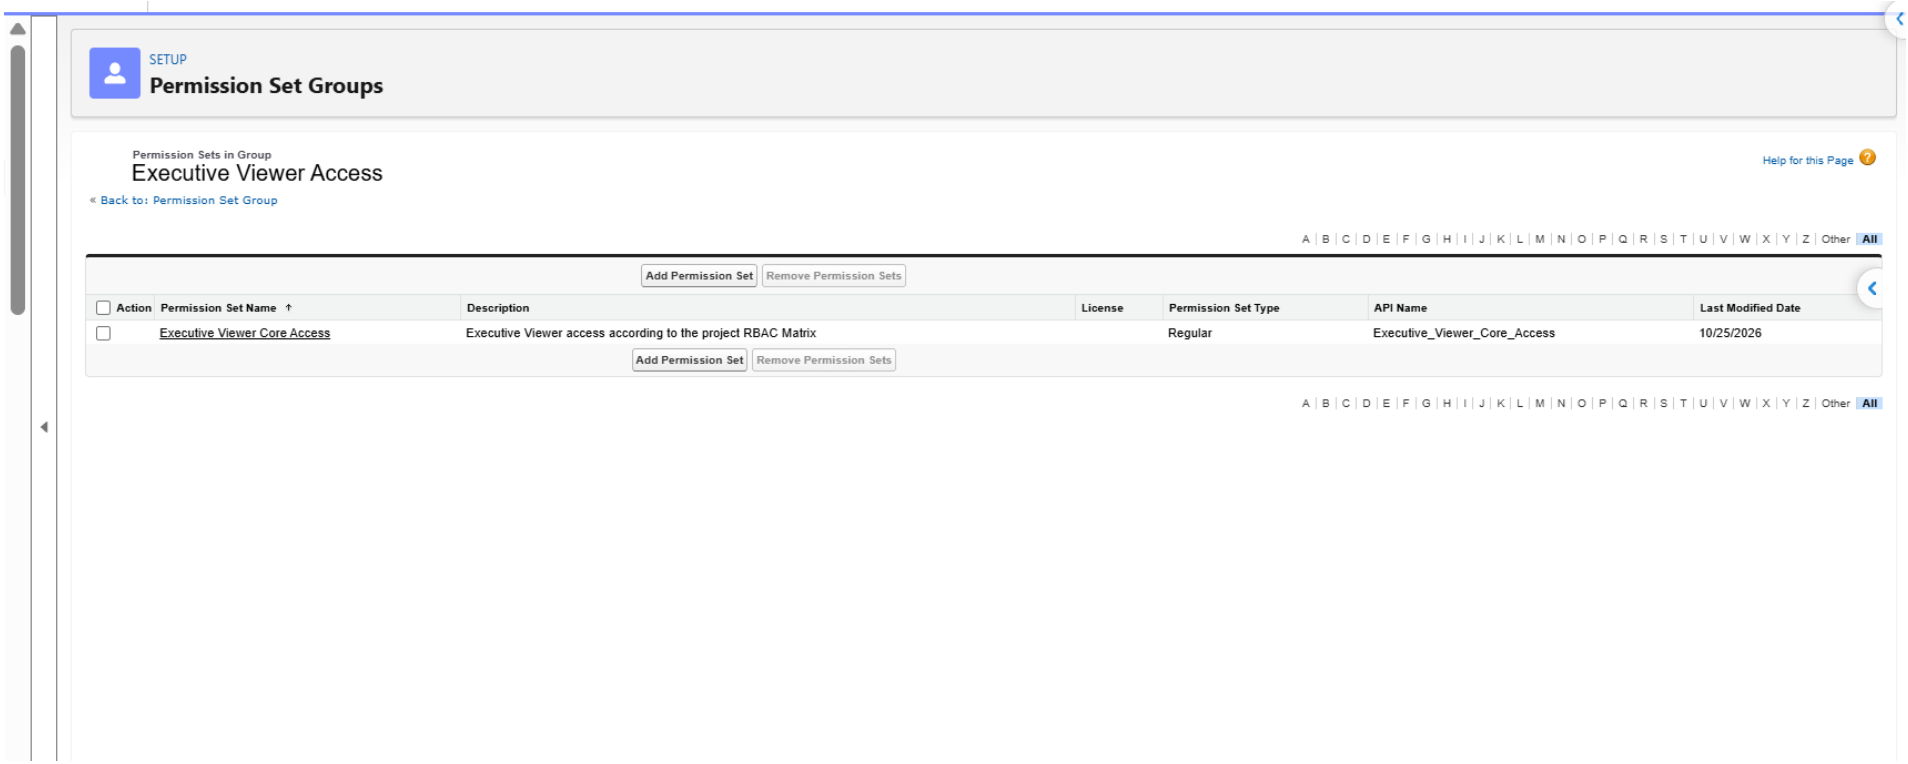

Evidence 11 - Executive Viewer permission-set group overview

The group exists and shows Updated status.

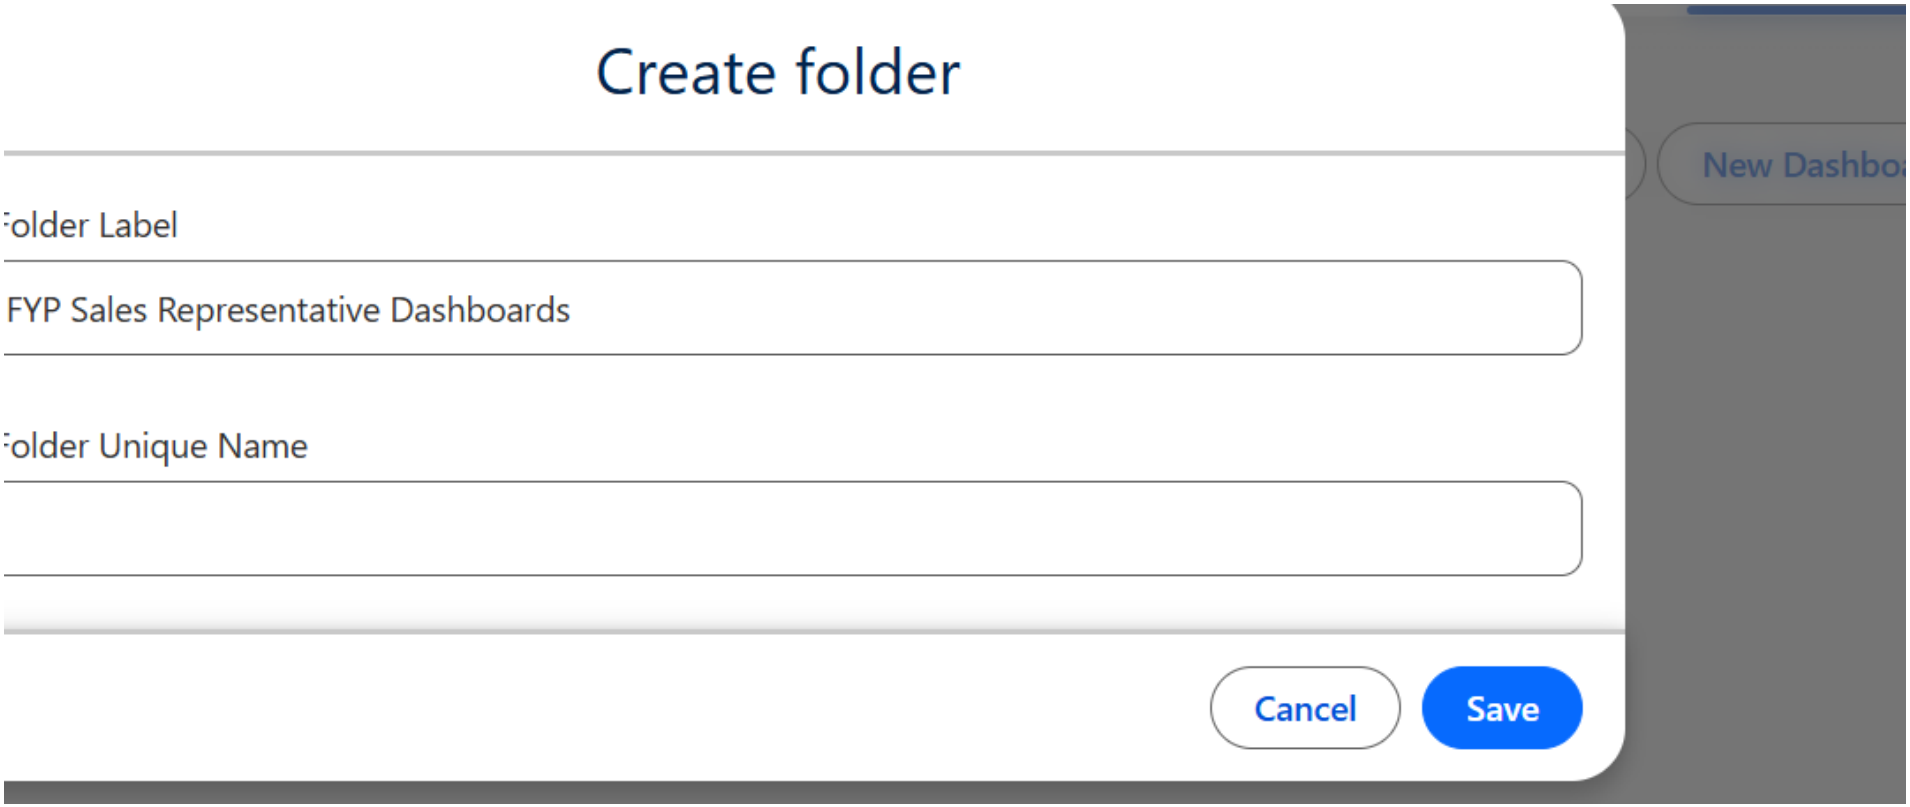

Evidence 12 - Executive Viewer Core Access added to its group

The group membership page lists Executive Viewer Core Access.

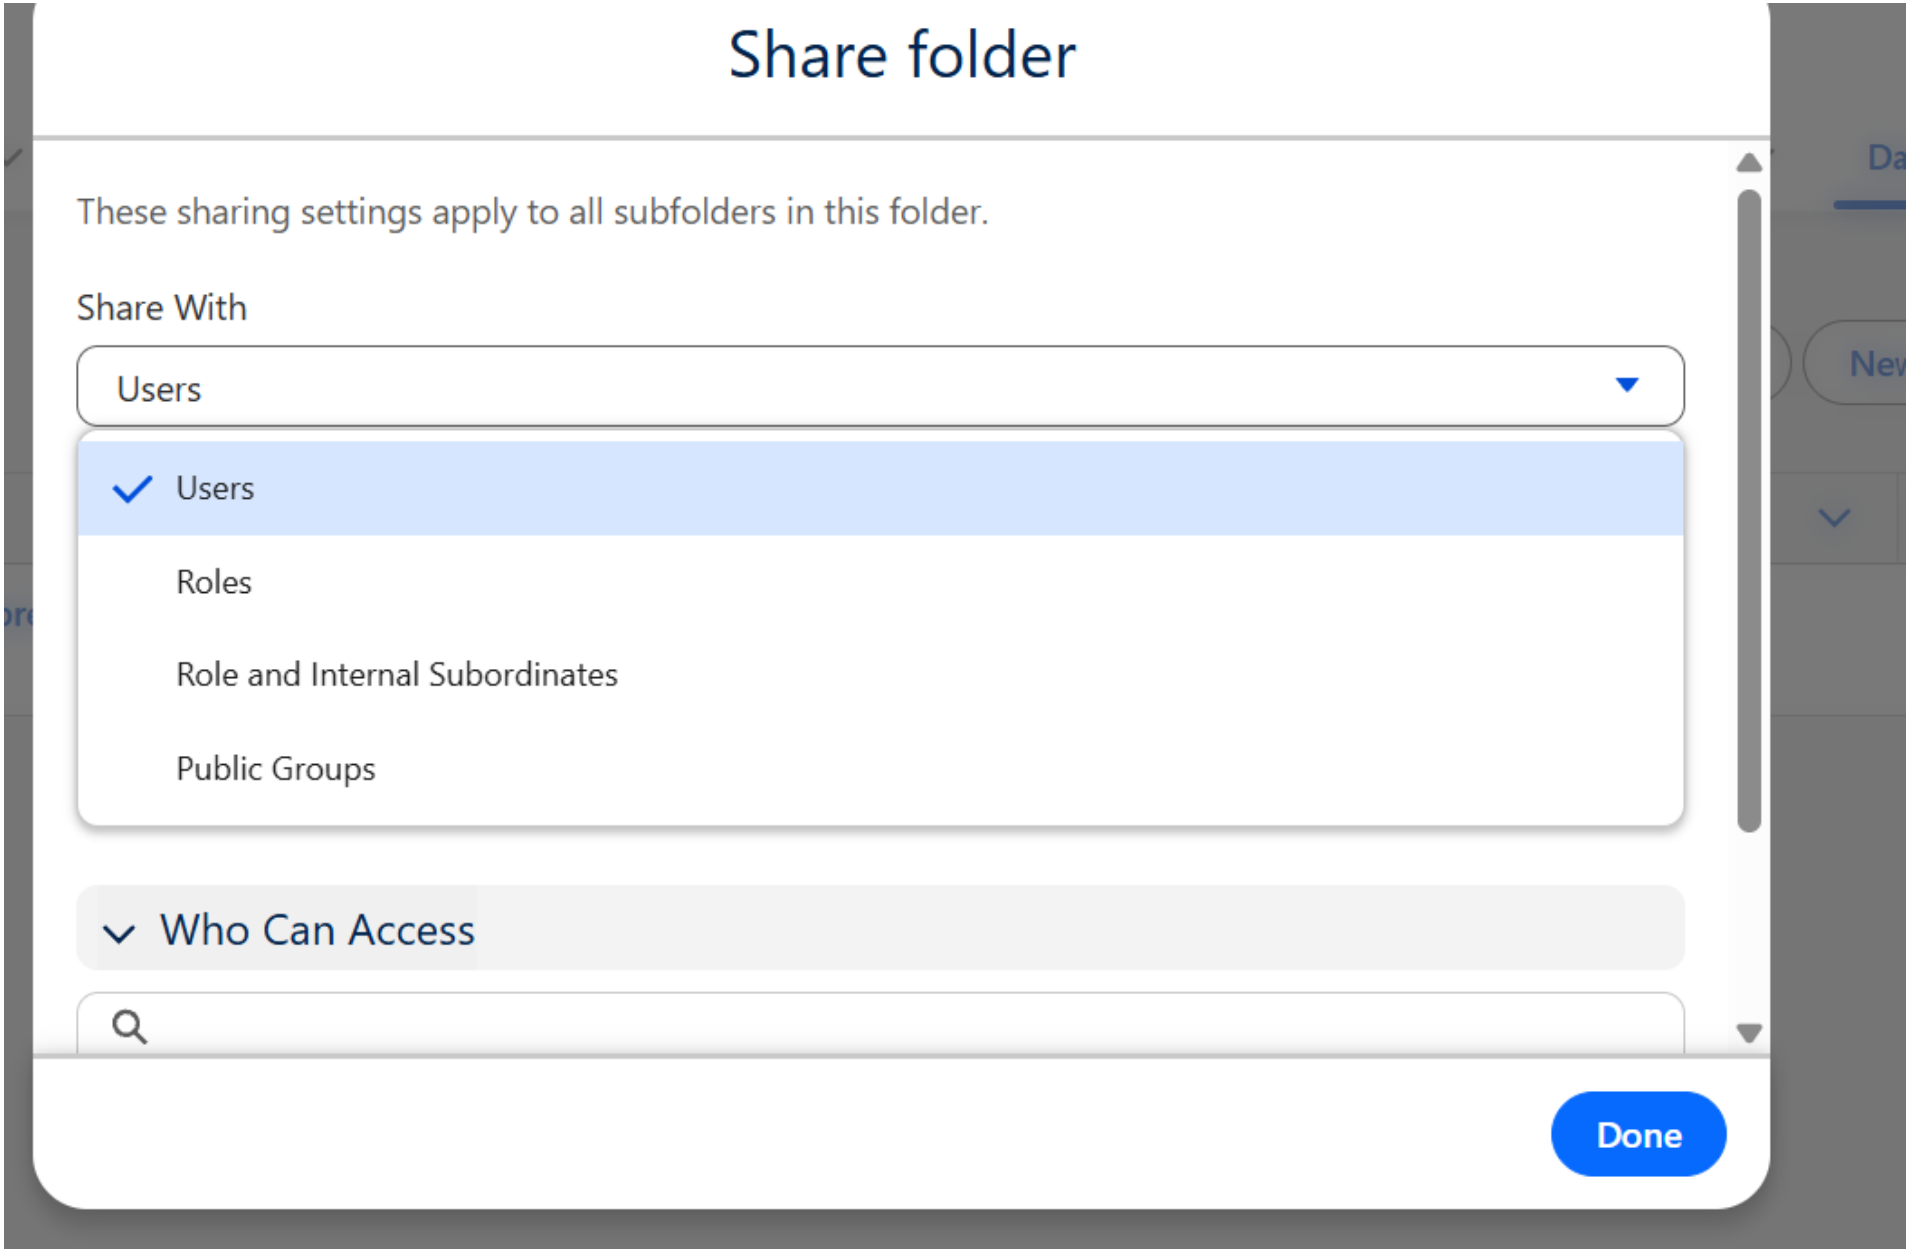

Evidence 13 - Create project dashboard folder

Salesforce folder creation dialog for the Sales Representative dashboard folder.

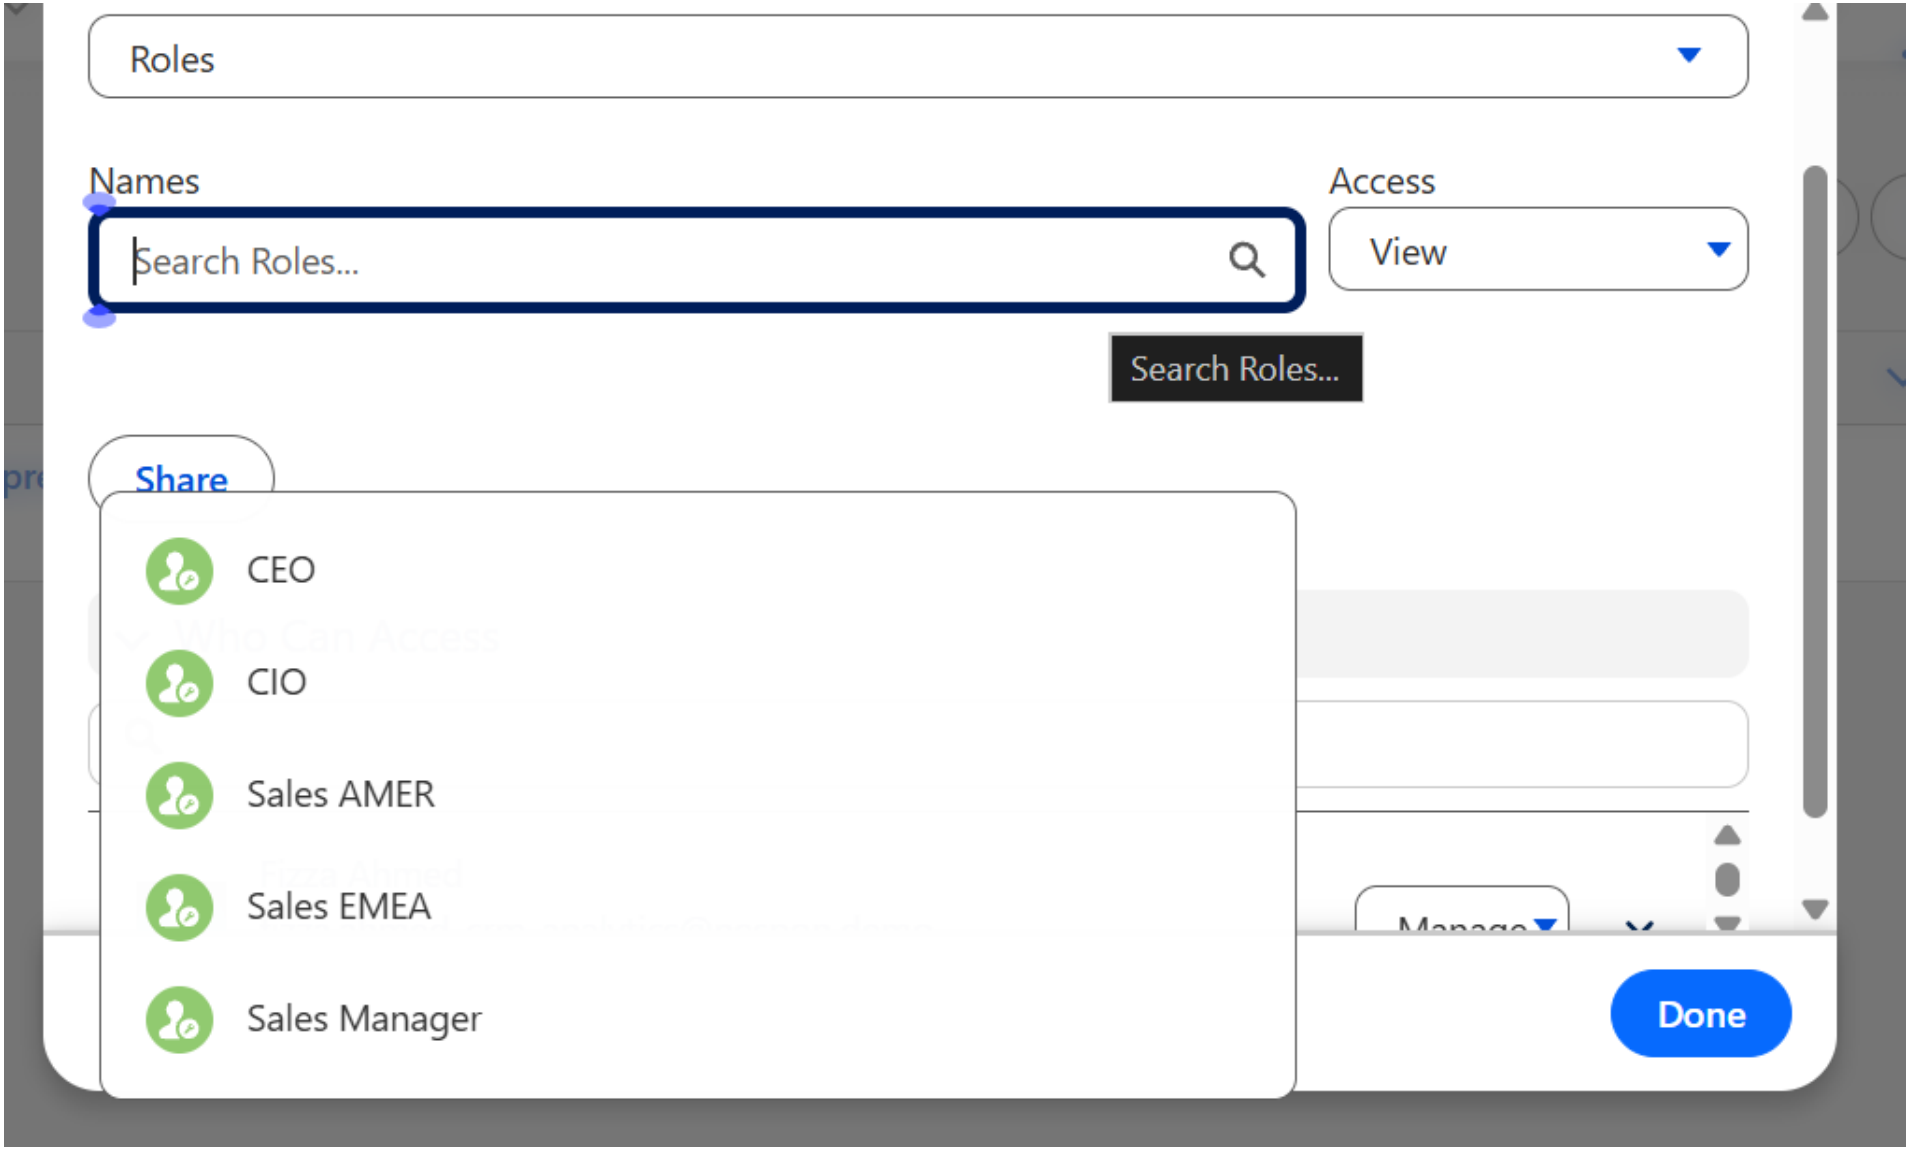

Evidence 14 - Folder sharing options

The folder-share dialog offers Users, Roles, Role and Internal Subordinates, and Public Groups.

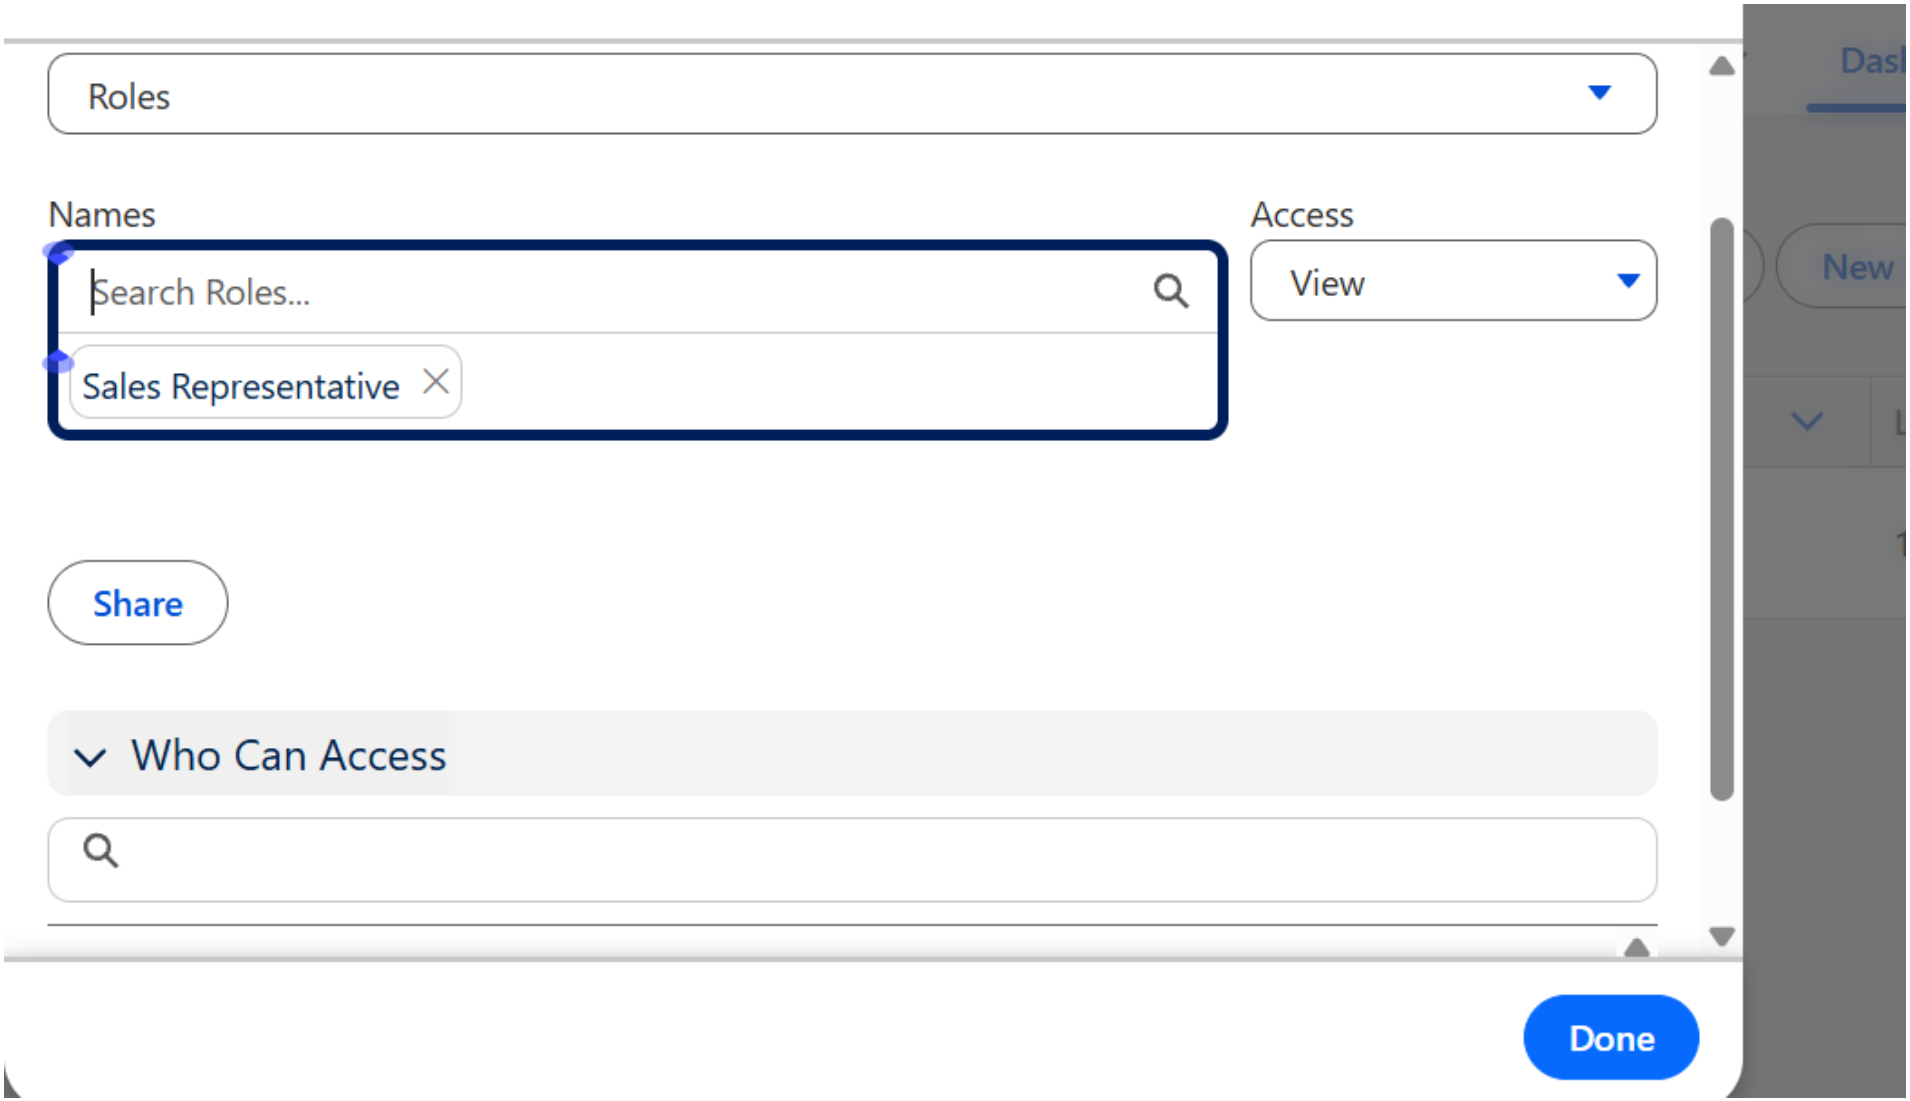

Evidence 15 - Selecting a Salesforce role for folder sharing

The selector shows available roles. A Permission Set Group name is not a Salesforce Role.

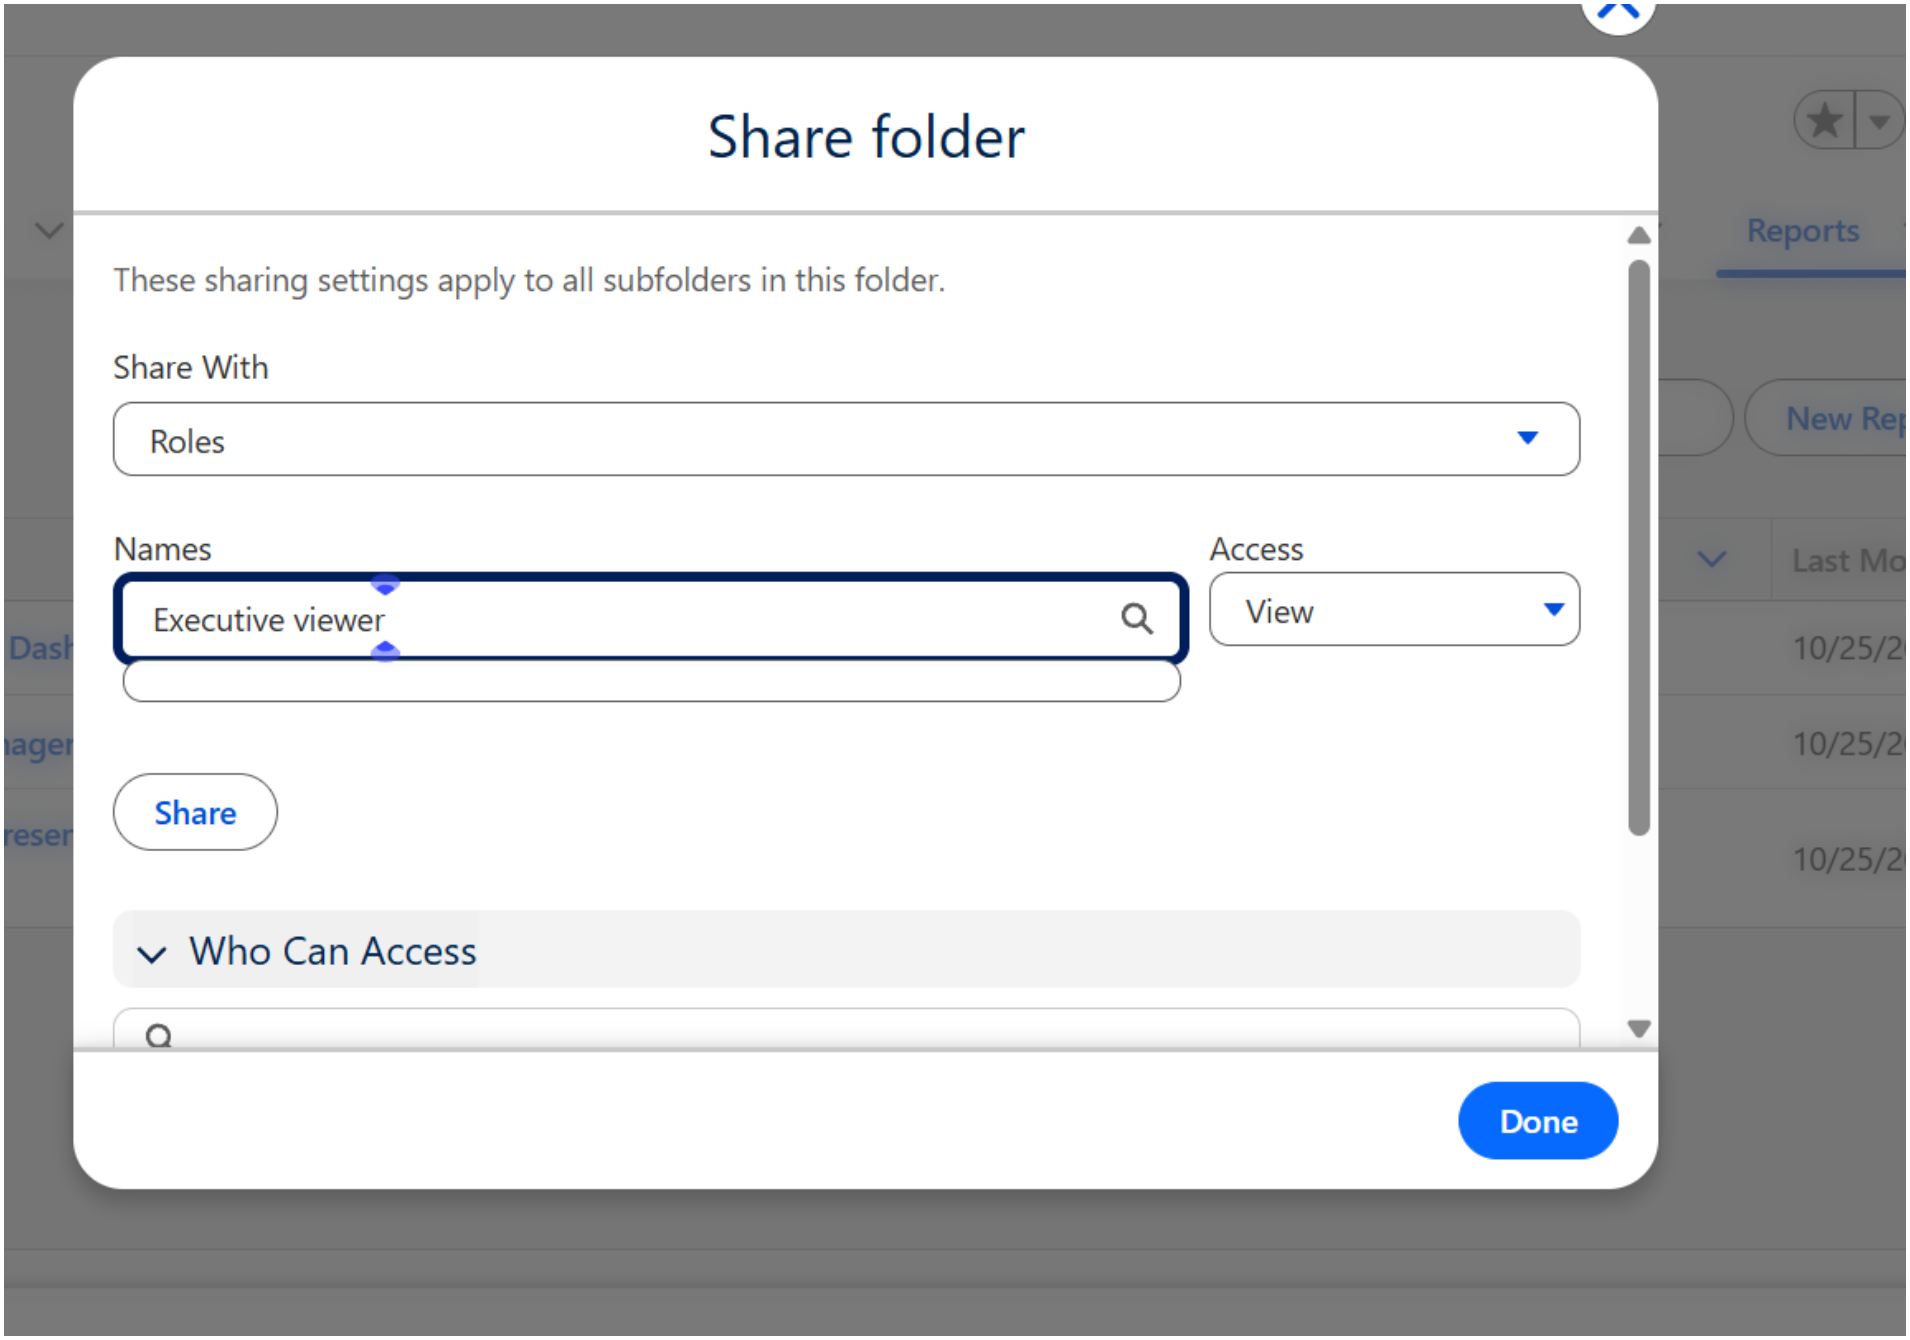

Evidence 16 - Sales Representative role selected for folder sharing

The dialog shows the Sales Representative role selected and View access.

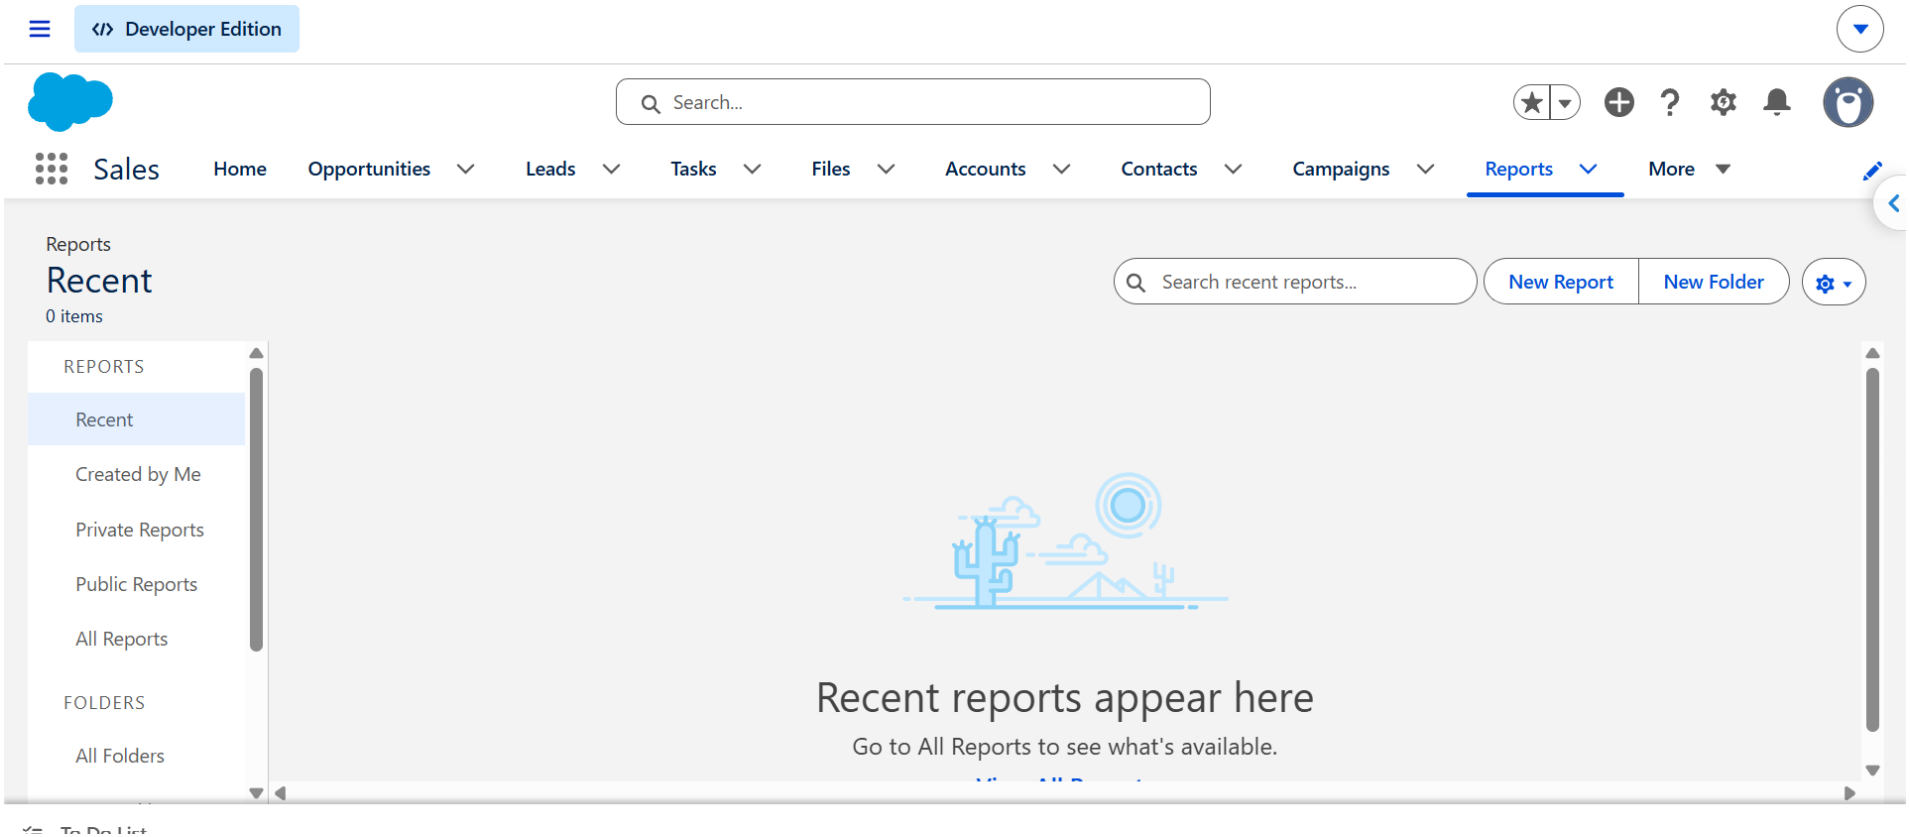

Evidence 17 - Executive Viewer role search

No matching Salesforce role appears for Executive Viewer; folder access for that group still needs an approved solution.

Evidence 18 - Reports page before project report creation

Recent reports is empty in this screenshot; project reports still need to be created.

Evidence 19 - Existing report folders visible in Salesforce

The visible folders are Einstein sample folders. The project instructions said not to share these as project folders.
